

IN THE SPECIFICATION

The specification is amended herein to address a minor typographical error. No new matter is added.

Please REPLACE the paragraph beginning at page 15, line 26, of the application with the following:

Namely, the CPU 18 performs the processing which leaves the target frame if the target frame is located at the predetermined interval in the input videovideo sequence. Otherwise, the CPU 18 performs the processing which skips the target frame as in the example of FIG. 1.
